*1: The lens will cause vignetting (darkening at corners). *2: Not performs a circular fish-eye effect. Able to capture a diagonal fish-eye image by zooming. *3: Super wideangle image can be captured but not performs fish-eye effect. *4: It turns out to a diagonal fish-eye without vignetting at about f = 8.1mm. *5: Performs a circular fish-eye effect at most wideangle position, and performs a diagonal fish-eye effect at about f = 15.4 mm without vignetting. *6: Performs a circular fish-eye effect. But not performs a diagonal fish-eye effect. *7 : Achieving a super wideangle image without vignetting at about f = 8.1mm. *8 : The lens will cause slight vignetting and resolution power at corners may be deteriorated. *9 : How to mount : [Please refer to this page.](#) *10 : Set a camera lens at F/10 or slower.
